Reissue Application

The amendment filed March 20, 2009 proposes amendments to the claims that do not comply with 37 CFR 1.173, which sets forth changes shown by markings in reissue applications. A supplemental paper correctly amending the reissue application is required. Pursuant to 37 CFR 1.173, any changes relative to the patent being reissued which are made to the specification, including the claims, upon filing, or by an amendment paper in the reissue application, must be made as follows:

An amendment paper must include the entire text of each claim being changed by such amendment paper and of each claim being added by such amendment paper. For any claim changed by the amendment paper, a parenthetical expression "amended, " "twice amended, " etc., should follow the claim number. Each changed patent claim and each added claim must include markings pursuant to paragraph (d) of this section, except that a patent claim or added claim should be canceled by a statement canceling the claim without presentation of the text of the claim.

It appears as though claim 17 should have a parenthetical expression of (twice amended) following the claim number.

Claim Rejections - 35 USC § 112

Claims 17-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed,

Art Unit: 3742

had possession of the claimed invention. The original patent disclosure does not provide sufficient support for the newly broadened "high-pressure chamber *formed* by walls *within* the housing, wherein the walls of the high-pressure chamber are *separate*...the high-pressure chamber *in communication* with the return channel and the perforated walls of the tunnel, with the gas circulation device maintaining the high-pressure chamber *at a higher pressure* than the return channel" (claim 17, lines 10-14). The original patent does not provide sufficient support for the newly presented language and therefore it does not appear that applicant was in possession of such at the time of the invention.

Claims 17-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 17-38 are not enabled given the lack of description.

Claim Rejections - 35 USC § 251

Claims 1-38 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175. The nature of the defects in the Declaration is set forth in the discussion above in this Office action.

Claims 17-38 are rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows: The original patent disclosure does not provide sufficient support for the newly broadened "high-pressure chamber *formed* by

Art Unit: 3742

walls *within* the housing, wherein the walls of the high-pressure chamber are *separate*...the high-pressure chamber *in communication* with the return channel and the perforated walls of the tunnel, with the gas circulation device maintaining the high-pressure chamber *at a higher pressure* than the return channel" (claim 17, lines 10-14). The original patent does not provide sufficient support for the newly presented language and therefore it does not appear that applicant was in possession of such at the time of the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-38 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 84/04808 to Smith. The structural features of the instantly rejected claims are structurally met by the reference. While features of an apparatus may be recited either structurally or functionally, claims directed to an apparatus must be distinguished from the prior art in terms of structure rather than function. In re Schreiber, 128 F.3d 1473, 1477-78, 44 USPQ2d 1429, 1431-32 (Fed. Cir. 1997) see also In re Swinehart, 439 F.2d 210, 212-13, 169 USPQ 226, 228-29 (CCPA 1971); In re Danly, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." Hewlett-Packard Co. v. Bausch & Lomb Inc., 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990). A claim containing a "recitation with

Art Unit: 3742

respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus” if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

Conclusion

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,354,196 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.
